

Readi-Mat

Intramuscular Injection | Prefilled Pens

- Choose a comfortable place in your home to inject medication
 - Gather supplies and place on your Readi-Mat
 - If medication is refrigerated, follow product instructions to prepare the medication for injection
- Choose an injection spot* that has been approved by your doctor
 - Wash your hands thoroughly
- Apply rubbing alcohol to a cotton ball and clean injection spot
 IF NEEDED: Apply numbing cream and cover with a large band-aid
 - IF NEEDED: Apply numbing cream and cover with a large band-aid or use an ice cube to numb the skin
- Remove numbing cream after recommended wait time; remove ice cube when area feels numb.
 - Apply rubbing alcohol to a cotton ball and clean the injection spot once again
- Follow the instructions provided with the prefilled auto-inject pen
 - Remove cap on the needle
- Gently pinch skin to create a fold at the injection spot
 - Place pen on the injection spot; be sure to hold pen at recommended angle
 - Press injection button and keep pen in place until pen is empty
 - Remove pen
- With a clean cotton ball, apply pressure to injection spot for 10 seconds
 - Apply band-aid, if needed
- Dispose pen safely in a sharps container

*Injection sites should be based on drug product mono graph and sites discussed by your doctor. *Select a slightly different injection site each time, at least one inch from the previous injection site
